DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 34-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over French in view of Meinikoff and Ruffin et al.

French discloses a method, portfolio of instruments, and a system for determining performance evaluation associated with a user's portfolio by simulating changes to the composition of a dynamic portfolio under a plurality of scenarios at a plurality of time steps (fig. 1). The users portfolio comprises a plurality of instruments. There is generated a dynamic portfolio comprising a plurality of instruments and having an initial composition that is identical to the composition of the user's portfolio. At least one rule for use in the simulation is defined in which changes are to be made to the composition of the dynamic portfolio. The defining step is performed prior to executing the simulation. At least one rule is dependant on at least one tracked attribute, one at least one tracking position, and on at least one trade position. One of a plurality of scenarios under which the simulation is to be performed is selected. The simulation is

executed under a plurality of time steps on the dynamic portfolio with substeps of valuing the dynamic portfolio, changing the dynamic portfolio, and repeating the substeps a plurality of time steps for each of a plurality of scenarios. French discloses rules including a band rule, where the rules inherently are assigned priorities and evaluated in order of that priority (fig. 4).

French does not disclose:

producing an output risk metric for the dynamic portfolio wherein the output metric is dependant on the composition of the dynamic portfolio after executing the simulation; and
executing a simulation under possible future scenarios.

Melnikoff discloses producing an output risk metric for a simulated portfolio wherein the output metric is dependant on the composition of the simulated portfolio after executing the simulation (col 9, lines 40-67).

It would have been obvious to one with ordinary skill in the art to include calculation of a risk metric to French because of what is taught by both Melnikoff and French. Melnikoff teaches simulation of a portfolio and that risk is a measure of performance (col 1, lines 59-61), and French teaches simulation of a portfolio to measure performance and acknowledges risk as a factor per se (col 7, lines 24-25).

It would have been obvious to one with ordinary skill in the art to include executing a simulation under possible future scenarios to French in view of Melnikoff because Ruffin et al teaches that before a business endeavor is invested in, an informed decision regarding possible scenarios regarding outcome is desired (col 2, lines 5-19).

Response to Arguments

3. Applicant's arguments filed 6-27-02 have been fully considered but they are not persuasive.

The agents to French perform "simulation" before a buy execution.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
